The next page will show all the transaction types available to your organization within AccessJFG. Since this guide is to build a profile with no entitlements, other than the Single Sign On, you will want to turn off access to these transactions.

The first transaction type will automatically pull into the right-hand side of the screen. To turn off access, click the **Enabled** slider to mark the transaction as **Disabled**. Then, uncheck the **View** box to turn off the ability to view these transaction types in the Online Activity Center.
